

I am a highly motivated Frontend Engineer with years of experience building user-centric web applications. Proven ability to deliver responsive and performant experiences using React and best practices in accessibility and SEO. Always eager to contribute to a fast-paced team and further develop skills in building scalable frontend architectures.

## EXPERIENCE

### Junior Frontend Developer | Zedi | July 2022 -Present

- Developed and integrated the Contentful CMS API to dynamically manage blog content on the website, improving content creation workflow and SEO opportunities.
- Implemented SEO best practices for multiple websites, resulting in improved organic search ranking and increased website traffic.
- Built a company website from scratch, including a user-friendly interface, responsive design, and seamless integration with backend functionalities.
- Developed an e-commerce platform with functionalities to manage both digital and physical products, enabling sales across various international and local stores.
- Integrated the Airtable API using post requests to efficiently retrieve and manage user data within the application.
- Reviewed and provided constructive feedback on pull requests submitted by other developers, fostering a collaborative development environment.
- Implemented responsive design principles and optimized sites for mobile devices
- Built multiple lead generation websites, focusing on user engagement and conversion optimization.
- Developed a website for a company with multi-page functionality and seamless YouTube video integration, enhancing user experience.
- Integrated the Facebook conversion API to track user actions on the website and optimize marketing campaigns.
- Collaborated effectively with backend developers to consume and manipulate data from various APIs, ensuring smooth data flow and user interactions.
- Enhanced a client's website by implementing social login options, including Google Sign-In, to improve user experience and increase registration rates.

### Freelance Experience

- Redesigned the UI of a cryptocurrency website, focusing on improved user experience, clarity, and visual appeal.
- Developed the redesigned UI using HTML, CSS, TailwindCss.
